

FIS96-E, FISD96-E Reed Frequency Meter

E-line reed frequency meters in which the frequency of the incoming signal makes the reeds resonate. Reed frequency meters can measure frequencies from 47 up to 63 Hz. Reed frequency meters have a vibration measuring system in which the reeds are vibrated electromagnetically. The FIS-E is a square model with a black front frame. The E-line provides single (FIS96-E) and double frequency meters (FISD96-E).
